SKILLS

Languages	Python, C++, Java, JavaScript, TypeScript, Golang
Framework	FastAPI, Django, Flask, REST APIs, Microservices, Next.js, Node.js
Database System	Oracle SQL, MySQL, PostgreSQL, MongoDB, SQL Server
Web Services	SOAP, REST, JSON, WSDL
Tools & Frontend	React, Angular, HTML5, CSS3, Git, Jira, VS Code, Postman, SoapUI
Cloud & DevOps	AWS (EC2, S3, Lambda), GCP, Azure, Docker, Kubernetes, Jenkins, Maven, Linux
Core Concepts	Data Structures & Algorithms, OOP, API Design, Distributed Systems, System Scalability

EXPERIENCE

Accenture

Packaged App Development Analyst Dec 2024-Present

- Designed and deployed scalable distributed backend systems using Python, FastAPI, REST APIs and GCP, improving system throughput by 55% and ensuring high availability and low-latency performance in production environments.
- Developed high-performance microservices with FastAPI and Oracle SQL, implementing optimized queries, JSON-based APIs, and CI/CD pipelines using Jenkins and Docker, reducing deployment effort by 30% and release errors by 25%.
- Implemented authentication, authorization, and secure API integrations while enhancing logging, monitoring, and observability, improving system reliability, fault tolerance, and performance optimization.

Packaged App Development Associate Sept 2023-Dec 2024

- Supported development and production operations of backend applications, performing root-cause analysis, debugging, and log-based anomaly detection, resolving 50+ production issues and reducing recurrence by 70%.
- Applied object-oriented design patterns and modular architecture to build scalable and maintainable distributed systems.
- Worked in an Agile/Scrum environment, collaborating across the full SDLC to deliver high-performance, production-grade software systems.

PERSONAL PROJECTS

[Splitease](#) — *(Click to see how the app works.)*

- Tech Stack: Next.js 15, Node.js (API routes), Convex, Tailwind CSS v4, Shadcn UI, Clerk, Inngest, Resend, Gemini API, Vercel
- Developed a full-stack web application to manage and split shared expenses, track settlements, and send automated reminders.
- Built scalable backend REST APIs using Node.js with event-driven and asynchronous workflows, integrating databases and third-party services for responsive system design.
- Integrated Gemini API for AI-based expense categorization and intelligent workflows.

EDUCATION

B.Tech in Computer Science, Government Engineering College Bharatpur Batch 2023

GPA: **9.03/10**

Higher Secondary, Sony Academy Public Sr. Sr. School July 2019

Percentage: **87.40%**

ACHIEVEMENTS

- | | |
|--|------|
| • Google Cloud Digital Leader Certification | 2025 |
| • Earned fast-track promotion and Wall of Fame recognition for consistently exceptional performance. | 2024 |
| • Received “Best Student” award for academic excellence and overall performance during graduation. | 2023 |
